- Angular, NgRx
- Express, Nestjs
- SQL, MogoDB, Prisma
- Cypress, Jest
- English (Fluent)
- Figma Design

ABOUT ME

- 3 Years of Experience | Full-Stack Software Engineer (Frontend-Focused)
- Specializing in building high-performance, scalable web applications for outsourcing and product-based development. Experienced in collaborating with international clients and cross-functional teams to create seamless user experiences and deliver impactful digital solutions.
- Proficient in React.js, Next.js, Angular, and Node.js, with a strong focus on clean architecture, maintainable code, and performance optimization. Seeking a Middle-level Frontend or Full-Stack role to contribute expertise and drive innovation.

WORK EXPERIENCE

Enlab Software

02/2022 - 01/2025

Fullstack Software Engineer

- Experienced Frontend Engineer with expertise in ReactJS and Angular, focusing on performance optimization and scalable architecture.
- Work directly with international clients, clarifying requirements, proposing solutions, and iterating based on feedback.
- Advocate for clean code and best practices, with experience in refactoring, reusable components, and test automation.
- Collaborate in Agile teams to deliver high-quality software while ensuring maintainability and performance.
- Active in knowledge sharing, organizing technical sessions in English and Vietnamese on Frontend development and industry best practices.

Projects

Enterprise Management Software - Vietnamese Product
